

DRINKING CONTAINER

ABSTRACT OF THE DISCLOSURE

A drinking container comprising a shell having an outer surface, an inner surface, a top portion, and a base, wherein the shell is transparent. The drinking container further comprises a sleeve having an open end, wherein the sleeve is fitted inside the shell and the sleeve is reflective. The drinking container also includes a plurality of optic panels or designs formed on the inner surface of the shell. The combination of transparent and reflective materials causes the outer surface of the shell to have a paneled appearance when, in fact, the outer surface of the shell is smooth and cylindrical.
